

## HEARST TEARS DOWN HARMONY BANNER BREEZED BY GRAVES

Tells Democrats His Party  
Will Join Them on His  
Terms Only.

## TAMMANY FEARS UP-STATE ALLIANCE

Leaders Uncommunicative, But  
Say Any Attempted Amalgama-  
tion Will Be Fought.

NEW YORK, April 15.—The National Democracy can amalgamate with the Hearst Independence League only by accepting dictation from Hearst.

That is the way local Democratic leaders define the offer sent by W. R. Hearst telling just how far John Temple Graves was authorized to go when he raised the Harmon, Hearst, and harmony banner.

Hearst claims that in New York he has destroyed Tammany Hall. This Tammany leaders today declare, emphatically, is a lie. The declaration of that line is read as an announcement that, at the coming primaries, he and his followers will try to capture the Tammany machinery, and Charles F. Murphy and his associates are already working to guard against that.

They read between the lines in Hearst's statement that he is trying to form an alliance with the up-State Democracy and capture the State machine.

Tammany admits if the Hearst plans are well financed they may succeed.

**Kills Amalgamation.**  
It is believed that Hearst has placed a surmountable object in the way of amalgamation with the Democracy by his attitude expressed as follows:

"I will own allegiance to no party that does not express my political convictions, and rather than be an insurgent inside of any party, I would be an independent outside of every party."

While none of the local Democratic leaders cared to answer Hearst in any way, they made it plain today that they must now oppose any alliance with him. If he is to become a power in this State, he will have to capture the machine through the primaries, according to the men now in control. This will be a hard task, and one Hearst has found impossible in the past.

The Hearst definition of an insurgent has not helped him much, it is claimed. He defines insurgents as "men who would be independents if they did not place a higher estimation upon their political jobs than they place upon their political principles. An insurgent cannot accomplish as he is cannot sacrifice."

**Hearst's Defiance.**  
Hearst's last word, even his followers here admit, is likely to prevent any amalgamation of his league and the Democrats. He says:

"Our independence forces will be ready to unite only with the Democratic party if—and only if—their principles can best be promoted by such a combination."

That spells "nothing doing" in a Harmon, Hearst, and harmony program in the opinion of Democrats here. But they point out that Hearst once changed his mind, accepted a nomination for governor at the hands of Murphy of Tammany and the personal influence of Roosevelt, who sent his Secretary of State to the rescue.

## HIGH COST OF LIVING DRIVES OUT PASTORS

Indiana Presbytery Suffers  
From Exodus of  
Ministers.

LAPORTE, Ind., April 15.—The Logansport Presbytery, made up of the northwestern counties of Indiana, has suffered from an exodus of pastors without parallel.

Two-fifths of the members have no minister. Three stated clerks have gone within three years. All three Presbyterian pastors in Logansport have gone. Rochester, Hammond, Winamac, and several other good churches are vacant.

This was the report made today to the Logansport Presbytery. The explanation offered is the present high prices and the fact that the clergymen to live within their salaries.

Rev. Howard Billman, of Kentland, was elected moderator. E. E. Horton, of Crown Point, stated clerk and Rev. G. A. Plugg, of Plymouth, permanent clerk.

## MAY BE ALLIANCE BETWEEN LEADERS

Governor Harmon and Tom  
Taggart Pursuing Same  
Course.

INDIANAPOLIS, Ind., April 15.—A possible alliance between the admirers of Gov. Judson Harmon, of Ohio, and the Taggart wing of the Democratic party in Indiana, to forestall the Marshall Presidential boom, today is causing a disturbing effect among friends of Gov. Thomas R. Marshall.

Governor Marshall wants a United States Senatorial candidate named by the State convention April 27 and 28. Taggart, former national Democratic chairman, has openly opposed such a course as bad politics. Governor Harmon, a few days ago, caused factional lines to be drawn in the Buckeye State by urging before the Ohio Democratic committee the immediate discontinuance of the convention method of naming candidates for Senator.

Harmon's Democratic leaders, particularly those who are advancing Governor Marshall for the 1912 nomination, believe they see a move on the part of Governor Harmon to popularize himself, with the Taggart contingent, opposing Governor Marshall's suggestion to the convention. Adherents already are organizing the Ohio Governor and Indiana leaders just such a plan as the Indiana governor proposes, a bid for popularity in Indiana.

The Democratic convention in Ohio will be held next month.

## ARMSTRONG MISSING, DENIES ANY FRAUD

Says Trust, as It Threatened,  
Forced His Insurance  
Company to Wall.

CHICAGO, April 15.—Robert B. Armstrong, former Assistant Secretary of the Treasury, cannot be found today at his residence, although he has just issued a flat denial here of charges made by a Christian, W. Va., that the Consolidated Casualty Company, a West Virginia corporation, of which he is president, conducted its affairs in violation of the law. The charges were made by John F. Roche, of New York, consulting actuary.

Mr. Armstrong in his statement which was given out by the local agency here says the company not only acted fully within its rights in all its transactions, but adds that it was hindered in every possible way by a combination of interests which have formed themselves into a surety trust, and that he was warned in this State, he will have to capture the machine through the primaries, according to the men now in control. This will be a hard task, and one Hearst has found impossible in the past.

The Hearst definition of an insurgent has not helped him much, it is claimed. He defines insurgents as "men who would be independents if they did not place a higher estimation upon their political jobs than they place upon their political principles. An insurgent cannot accomplish as he is cannot sacrifice."

Hearst's last word, even his followers here admit, is likely to prevent any amalgamation of his league and the Democrats. He says:

"Our independence forces will be ready to unite only with the Democratic party if—and only if—their principles can best be promoted by such a combination."

That spells "nothing doing" in a Harmon, Hearst, and harmony program in the opinion of Democrats here. But they point out that Hearst once changed his mind, accepted a nomination for governor at the hands of Murphy of Tammany and the personal influence of Roosevelt, who sent his Secretary of State to the rescue.

Information from Charleston is to the effect that a thorough investigation of the Consolidated Casualty Company's affairs will be made by State officials. Armstrong cannot be found at his home. He has just sold his residence for \$22,000. Neighbors say he has not been seen for some days.

## MOTORCYCLE LAMAGED.

While riding a motorcycle at Eighth street and Rhode Island avenue early this morning, Elmer C. Story, an employee of the Health Department, collided with an automobile driven by an unidentified man, and thrown to the pavement. Story was not hurt but the motorcycle was badly smashed.

## Pleasant, Refreshing, Beneficial.

Syrup of Figs and Elixir of Senna appeals to the cultured and the well-informed and the healthy because its component parts are simple and wholesome and because it acts without disturbing the natural functions, as it is wholly free from every objectionable quality or substance. In its production a pleasant and refreshing syrup of the figs of California is united with the laxative and carminative properties of certain plants known to act most beneficially, on the human system, when its gentle cleansing is desired. To get its beneficial effects, always buy the genuine, for sale by all reputable druggists; one size only, price fifty cents a bottle. The name of the company—California Fig Syrup Co.—is always plainly printed upon the front of every package of the genuine.

California Fig Syrup Co.  
LOUISVILLE, KY. SAN FRANCISCO, CAL. NEW YORK, N. Y.

## CLOCK BILL HELD TO BE UNNECESSARY

Commissioners Think Their  
Own Regulations Are  
Sufficient.

## ARE NOW REQUIRED TO KEEP GOOD TIME

Public Timepieces Subject to Re-  
moval If They Fail in  
Duties.

After careful consideration of the bill introduced by Representative Coudrey of Missouri making it a misdemeanor to display a clock on the streets or avenues of the District unless the timepiece is running day and night and kept within two minutes of the correct time, the conclusion reached by the Commissioners is that the proposed legislation is unnecessary. The penalty proposed by Mr. Coudrey's bill is a fine of \$5 for each and every offense.

Under the present regulations permits are granted by the Commissioners to locate clocks on public spaces, upon compliance with certain conditions, one of which is that the removal of the clock may be required upon its habitual failure to run or indicate the correct time.

No special permit is required for the location of a clock on any private building, but such clock is permitted if the building regulations as to safety are complied with.

The views of the board are expressed in the following letter to Representative S. W. Smith, chairman of the House Committee on the District of Columbia: "The Commissioners see no necessity for the legislation proposed in this bill, as they believe the persons displaying clocks make every reasonable effort to have them maintain the correct time, and if there is any serious infraction of the conditions of the permit in this respect the removal of such clocks from public spaces can be required without such legislation. They doubt the constitutionality of any law which would attempt to regulate the time kept by clocks on private buildings."

He has recommended that the building be discontinued for school purposes, which recommendation the Commissioners have referred to the Board of Education, which has decided that this is a rented building and cannot be repaired from public funds.

That there is a lack of ventilation in the annex to the Smothers School, near Benning, is the information conveyed to Health Officer Woodward by Inspector John L. Norris. Under such circumstances the name of the school is regarded by Inspector Norris as most appropriate.

Plans to help raise \$2,000,000 as an endowment fund to enable the university to move to its new site at Homewood on the outskirts of Baltimore will be discussed by the Washington alumni of Johns Hopkins University at their annual dinner at the Arlington tonight.

The guest of honor will be Ambassador James Bryce, Commissioner of Labor, president of the District Alumni Association, will be co-master. Professor William H. Welch, of the Johns Hopkins faculty, will represent the university.

A large attendance is expected at the meeting of the Biological Society of Washington tonight, when the annual light on the mosquito will start. There will be an illustrated lecture on the mosquito by Dr. John R. Smith, State entomologist of New Jersey.

## SUGAR MEN'S PEST IS BEING FOUGHT

Insect Enemy of Cicada In-  
troduced in Hawaii From  
Australia.

All the world has been searched for the natural enemy of the little cicada, which has been committing awful depredations in the sugar cane fields of Hawaii. The pest is no longer than one-eighth of an inch, and it bores into the stalk near the ground, and soon afterward the plant commences to wither and dies.

Like most of these pests, the cicada multiplies very rapidly, having six broods in the course of one season, so that at the end of one year one of these insects is at the head of a family of 64,000,000. The sugar industry of the island was so seriously threatened that it was decided to make a world-wide investigation to ascertain the source of the pest, and to discover some means of combating it.

It was concluded that the insect had been introduced from Australia, and entomologists were sent there with the hope of discovering its natural enemy, in which they were successful, for it was found in two species of the ichneumon fly, one of which deposits its eggs on the interior of the eggs of the cicada, and the other is destroyed by the larvae of the fly.

These insects have been successfully colonized in Hawaii, and great success is attending the efforts to annihilate the cicada.—Newark News.

## SMOTHERS SCHOOL MAY BE ABANDONED

Lack of Ventilation Said to Be  
Such as to Make Name  
Appropriate.

## TRAINING SCHOOL PUPILS GIVE PLAY

Costumes, Scenery, and  
Lighting Effects All  
Work of Scholars.

Before an audience of students and friends of the school that filled the large assembly hall to its capacity, the Dramatic Society of the McKinley Manual Training School last night offered the second of its annual school plays, "In His Uncle's Uniform," a comedy in three acts translated from Schiller's "Der Neffe als Onkel."

The rising of the curtain presented a color scheme that was a credit to the work of the drawing instructor, Miss Doherty, and to the students who accomplished it.

The costumes worn by the young women in the cast represented the work of the Domestic Art Department of the school.

The arrangement of the stage lights was the work of the students.

## PLANNING TO AID THEIR ALMA MATER

James Bryce to Be Guest of Honor  
at Johns Hopkins  
Dinner.
